About

I'm a Front-end developer with a year of experience in developing and with 5+ years of experience as a system administrator. While I was working as a developer I had experience with different technologies, like Storybook, Tailwind CSS, WordPress, Slider js, JavaScript etc. I managed to take part in the creation of 4 websites of different complexity that you can see on my LinkedIn.

As a person for whom product quality is important, I'd like to create those products and because of that I chose front-end development. I'm passionate about web development a lot and want to continue increasing further in this way.

Hard skills

JavaScript (ES5, ES6), React, HTML, CSS (SCSS/SASS).

HTTP, API, Git, Git Flow, Github/GitLab, Bootstrap, Tailwind CSS, Gulp/WebPack, npm, Storybook, BEM, Figma, responsive/adaptive layout.

Career Summary

Junior Front-end developer

wwwest.solutions since 10/2022 - to 06/2023

- During this period I was building multi-page adaptive and responsive websites with JS, HTML, CSS(SCSS), CSS Modules, Swiper plugin. Also, I have been working with CMS WordPress creating a layout to integrate it with the back-end part. The WebPack was the main builder for all projects.

System Administrator

SETAM since 06/2018 - to 01/2022

System Administrator assistant

ARSENAL - CENTER since 03/2017 - 05/2018

Education and Trainings

UDEMY

WEB-developer (Ivan Petrychenko)

Grade Education Centre

From A2 Elementary to B1 Pre-Intermediate

Profesional lyceum of Pryluky (Ukraine)

Car mechanic.
from Sept. 2011 to March 2014

ITEA

Python advanced in 2019

Projects

Vbrani

Vbrani – is a project where elderly people create knitted products. This is the space that allows them self-development and gives opportunity creativity and opportunity for better integration to the social.

I had been creating web pages, components, elements, sliders, added scripts, CSS styles, and improved existing styles and scripts.

Tech stack:

HTML, CSS(SCSS), JS, JQuery, WordPress, Woocommerce, Swiper, Webpack.

NDA

Kosher food project. This is a multi-page site with a personal account of the user, advice from Jewish rabbis, and a guide to choosing kosher food, they are also engaged in certification of this food and already have more than 4000 international customers. The project has many animations made on Lottie and different types of sliders. The project turned out to be very interesting.

I had been creating elements, components, and full pages, also styled and adapted them for different screen sizes, and wrote a script for pagination and an arrow back button in pure JS.

Tech stack:

HTML, CSS(SCSS), Tailwind CSS, JS, JQuery, WordPress, Swiper, GSAP, Webpack, Storybook.
